

ExperiLearn

ExperiLearn Works :: ExperiLearn Scholars
Leadership and Career Development

ExperiLearn Scholars (EL Scholars) is a **leadership and career development program** that prepares participants for a successful and prosperous life, created through workshops, exploration and project activities. EL Scholars hones life, scholastic and trade skill sets that are vital to participants' personal and professional goals and ambitions. ExperiLearn Works takes an **experiential learning** approach, integrating the program with engaging activities that teach, expose, explore and advance the essentials necessary to be successful.

What is experiential learning?

- An approach to learning in which participants engage in an activity, reflect on the activity critically, and obtain useful insight
- Learning which is developed experientially is "owned" by the learner and becomes an effective and integral aspect of behavioral change. Skill development, versus simply acquiring knowledge and concepts

EL Scholars core components: Leadership and Career Development

Leadership skills; such as, yet not limit to...

Communication – Information gathering and analysis – Planning – Team building – Decision making – Conflict resolve – Time management – Global competency

Career services; such as, yet not limit to...

Career exploration – Knowledge & skills inventory/assessment – Work ethic – Education & training plan – Resume – Career field focused workshops & activities – Entrepreneurship

This knowledge and skills will be developed via projects and activities that contextualize and yield tangible outcomes to the participants and various communities. The program is easily customized to accommodate any focus or theme: computer technologies, science, music production, community service, mentorship, career exploration and readiness, social justice, visual arts, academic enrichment, engineering, health and wellness, financial competency, etc.

ExperiLearn Works specialty projects
